great energy. balanced life.

EMERGENCY DETOUR ROUTE (EDR)

Emergency Detour Route

An Emergency Detour Route (EDR) is a pre-determined route to help you bypass an emergency road closure and minimize delays in your travel.

The purpose is to divert/detour traffic in the event of a provincial highway closure.

If a provincial highway is closed, always follow the specially marked signs to go around the affected route.

Emergency detour route signage

This sign is posted on the side of the road near the start of the closure

Signs marked "EDR" along with an arrow are also placed along the designated detour route.

These signs are used to guide motorists along the designated route to bypass the road closure. Motorists then follow these signs back to the highway.
