

# BRINGING NATURAL GAS TO YOUR COMMUNITY

EPCOR Construction Update: spring 2022

EPCOR is proud to bring natural gas service to your community. Along with our construction partner, AECON, and our environmental consultant, Stantec, we will be working throughout the construction season on the service network that will bring natural gas to customers who have signed up for service.

## CONSTRUCTION ACTIVITY

Here is what you can expect as we complete the distribution system and connect properties to natural gas service.

Many properties have landscaping or driveways that extend on top of the public utility corridor where we will complete our work. This may result in driveways and sidewalks being cut or landscaping disrupted to expose underground utilities. Areas disturbed by construction will be restored.

Contact EPCOR if you have underground systems, such as sprinklers, invisible dog fences or septic systems as these cannot be identified through utility locating services and could be damaged during construction.

## CONSTRUCTION SCHEDULE

Construction will begin in each community as noted below. For more information, please visit our website.

May	July	August	November
Inverhuron	Kincardine	Ripley	Tiverton
Chesley	Lucknow		
Paisley			
Lurgan Beach			
Point Clark			

## SAFETY IS OUR FIRST PRIORITY

Safety is a responsibility we all share and EPCOR's top priority. Please slow down and stay safe around construction.

## FIND OUT MORE

Have question about the projects?  
Want to sign up for natural gas service?  
Don't hesitate to contact us.
